

EXHIBITION OVERVIEW

Essential Water

Water is the essence of life. It covers 71% of the Earth's surface and is vital for all known forms of life. We drink it, play in it, bathe in it, and wash our cars in it. Political disputes have focused on it. Storms have brought too much water and droughts have turned fields to dust. In some places, it's treasured and incredibly difficult to get. In others, it's incredibly easy to get and then squandered. Your camera lens may capture water in any of its many forms.
